Step-by-Step Guide to Page View Reporting in Google Analytics

1. Log into the Google Analytics portal

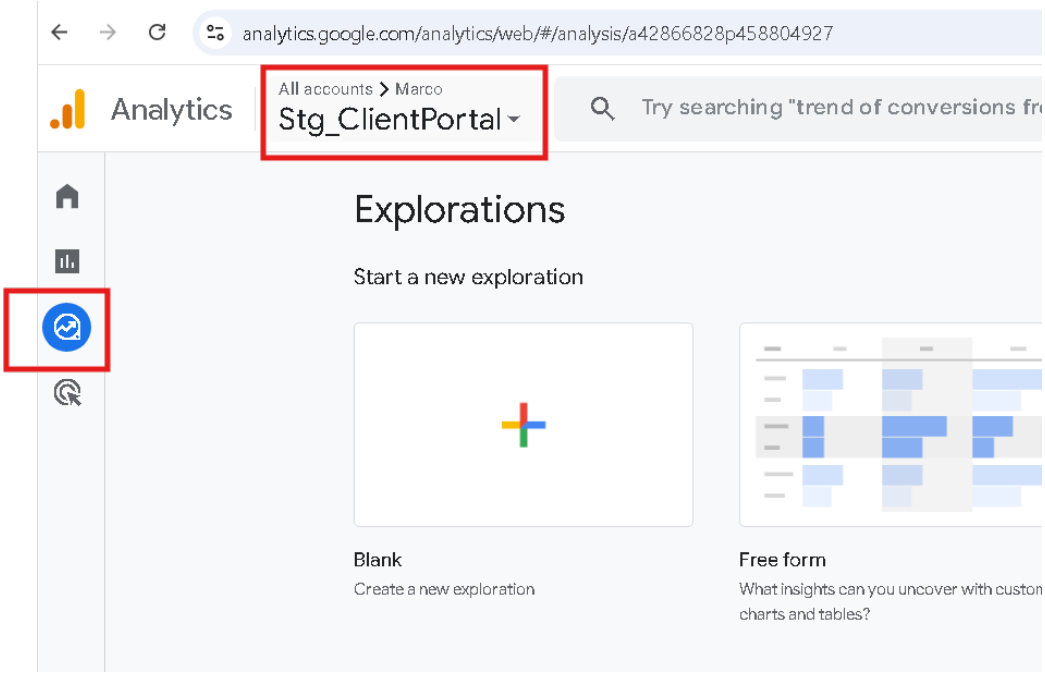
   https://analytics.google.com/

2. Click on **All Accounts** tab on the top left which is right next to the Google Analytics logo

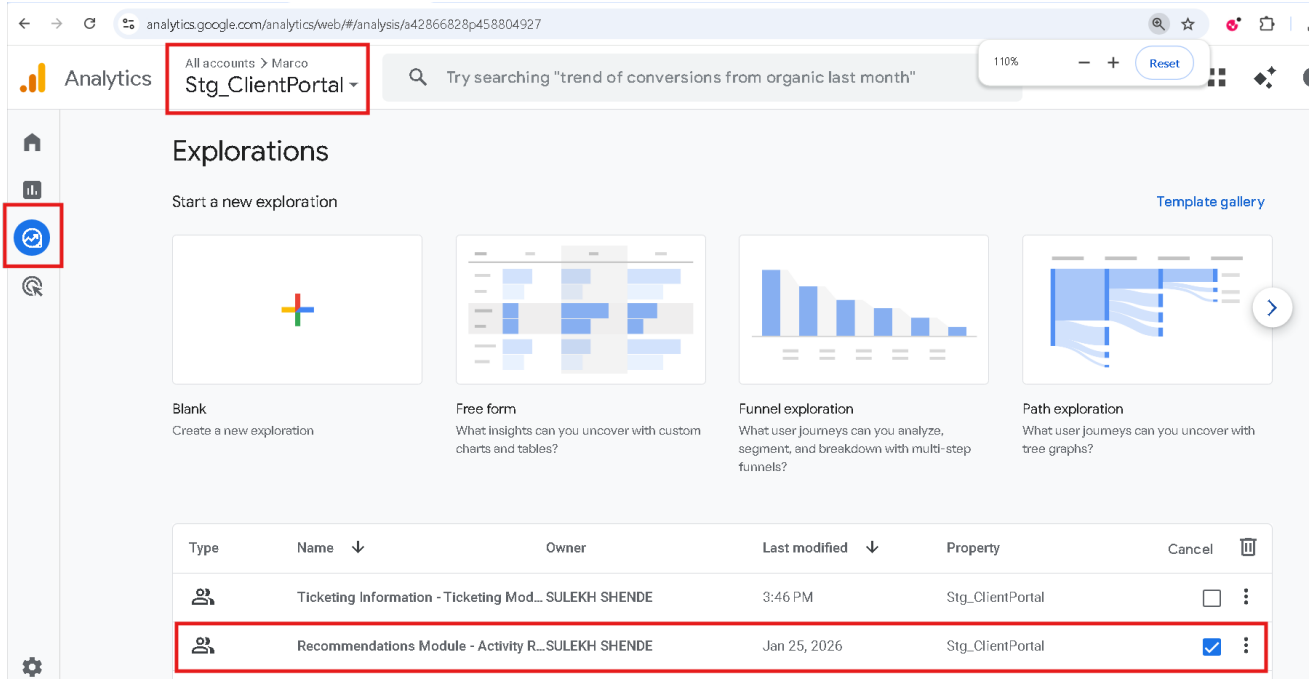
   To view stage related data, select **Marco Analytics** Accounts and **Stg_ClientPortal** property

   In order to view data for stage1 environment, select **Stg_ClientPortal** property.

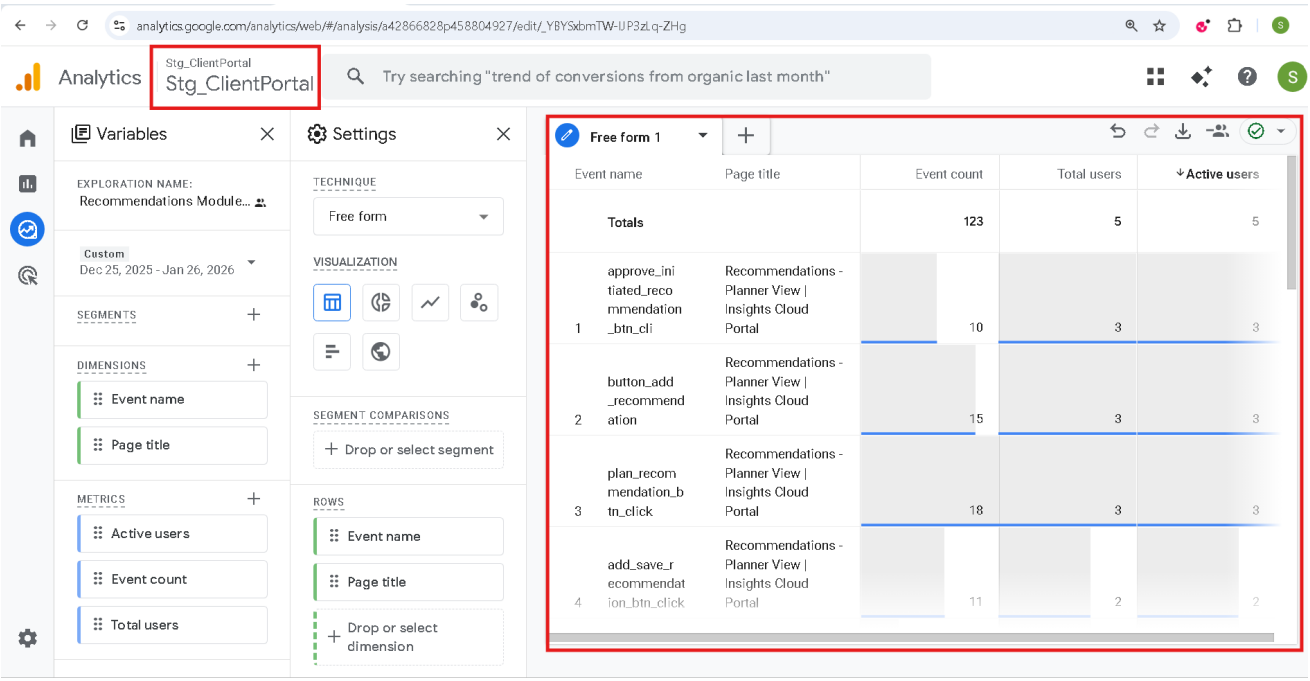
3. Go to **Explore** .



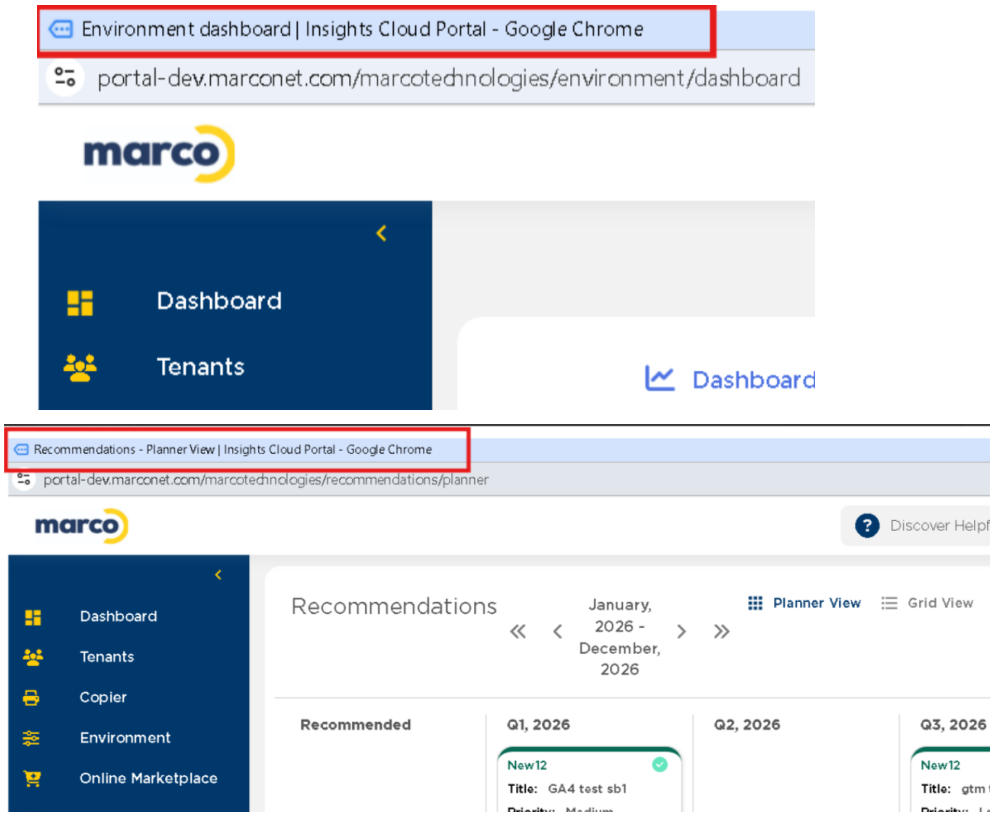
The Explore report shows data list of reports with names, click on the **Recommendation Module - Activity Report**

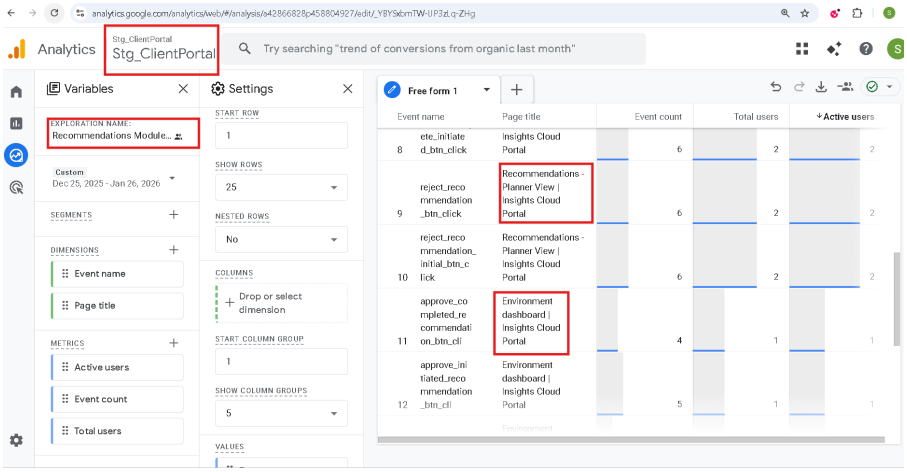


You can view report with dimensions set in Rows as **Event Name**, **Page Title** and **Metrics** set in Values as Event Count, Total Users and Active Users



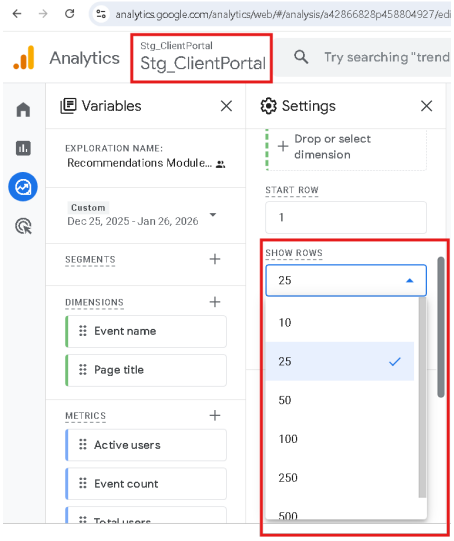
Page Title refers to the title that appears in the browser tab when a user visits a page



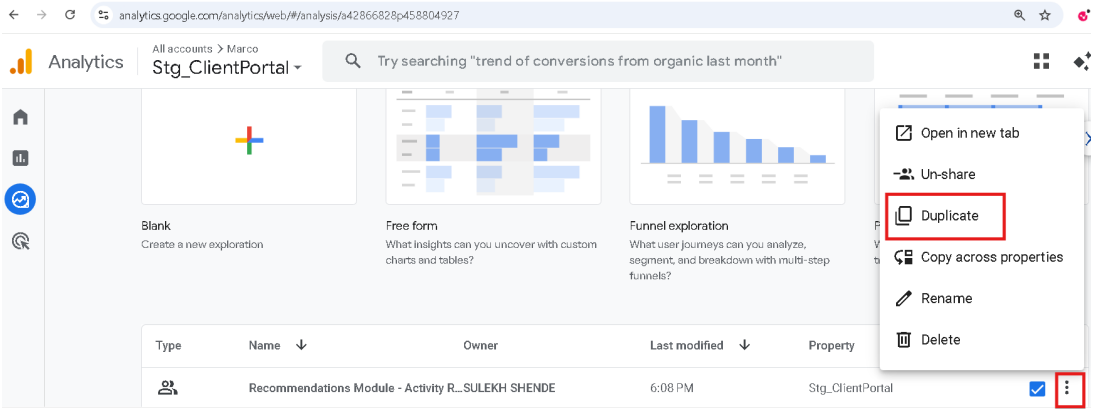


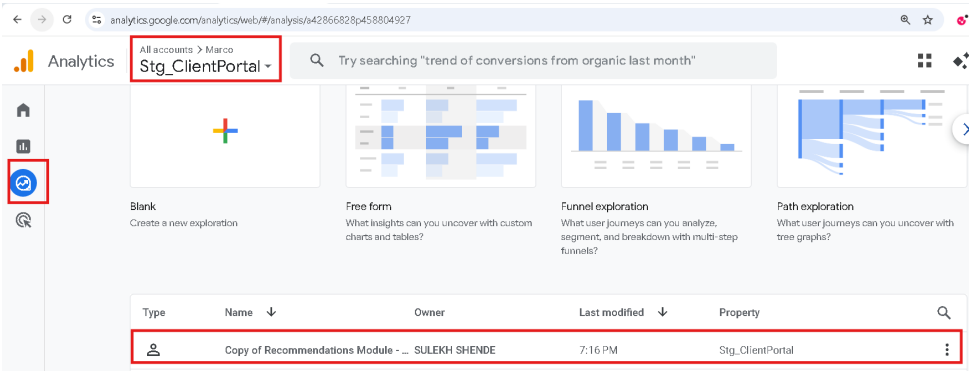
4. **Shows Rows**.

One can also change the rows display count for events displayed in report by default **10** is set, we can **click on dropdown arrow and select display rows value**.



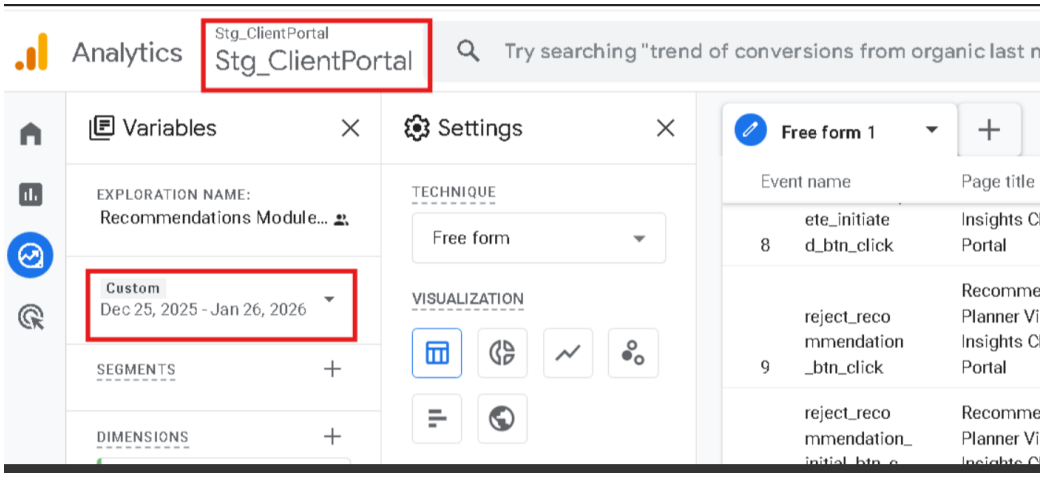
5. **Custom Date Change** : Only the user who created report can change the date. In order to change date we need to create copy of report by selecting report and clicking on three dots and Duplicate



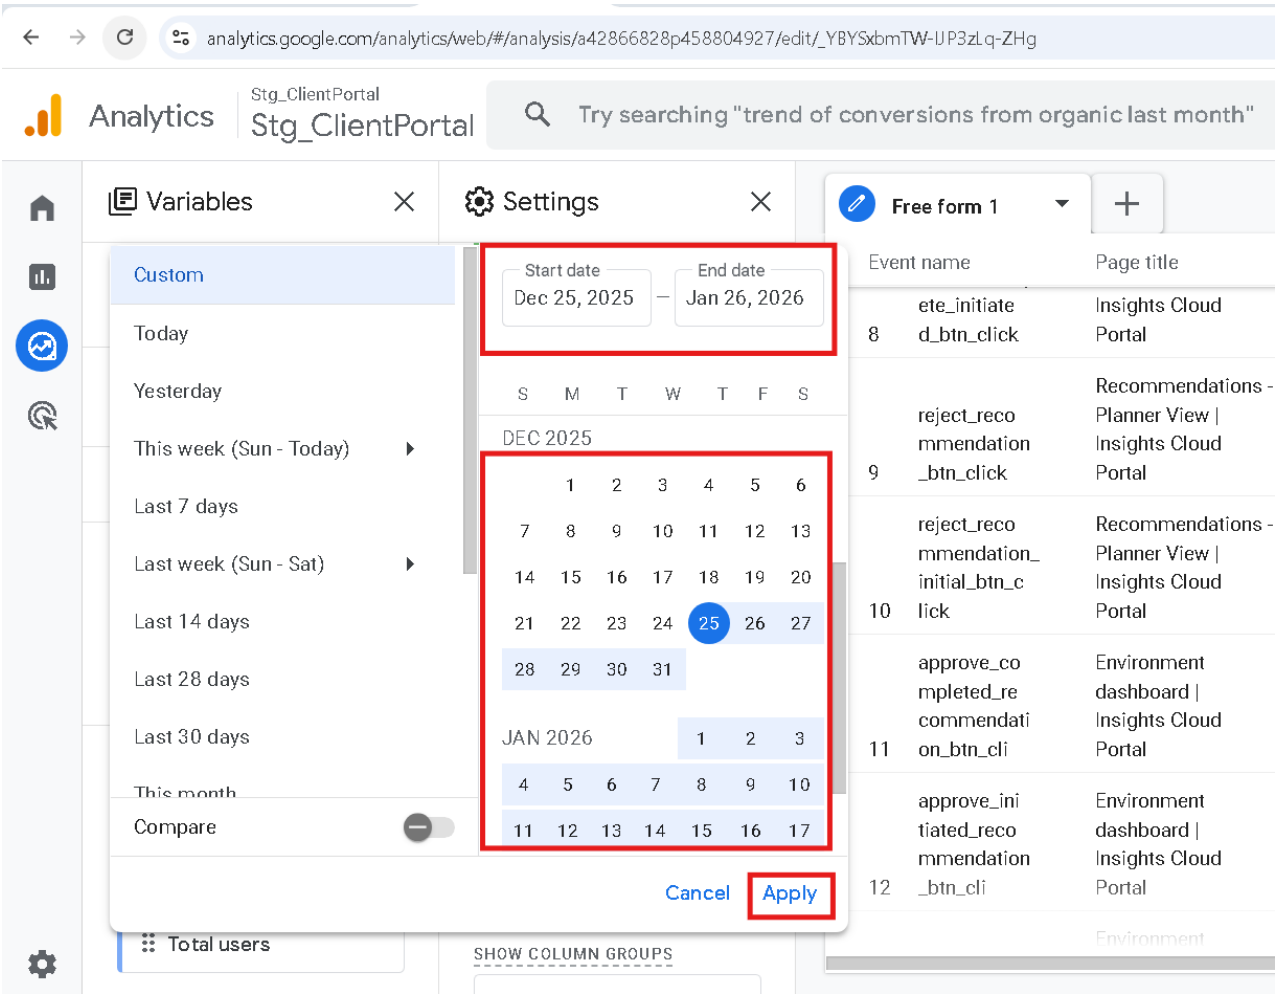


6. View data for **specific date /date range**

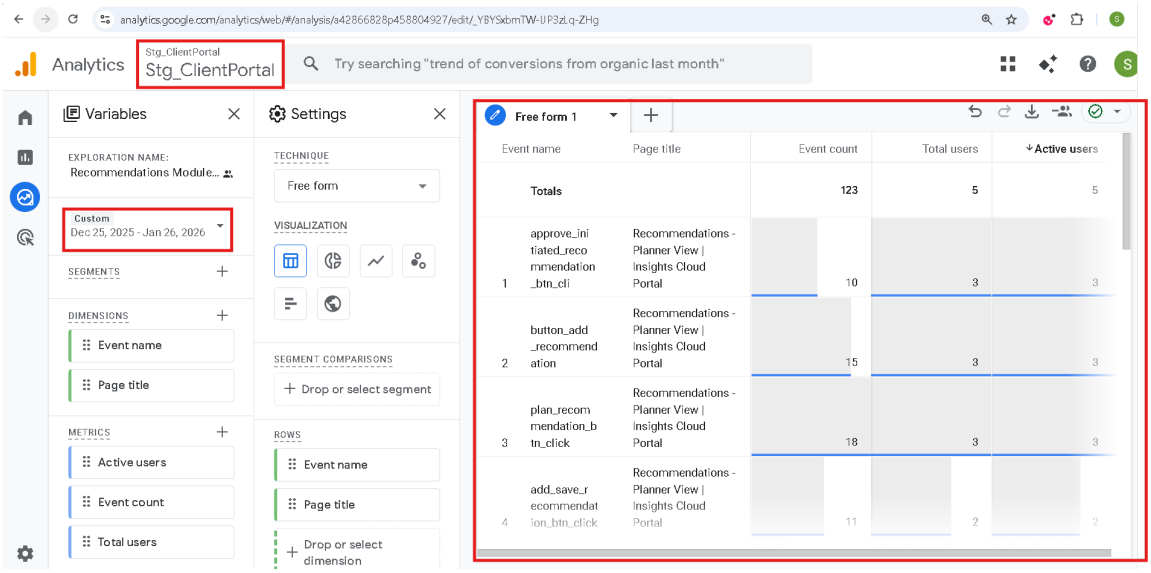
One can change the custom date range now by opening the copy of report made in earlier step and view the data for specific date range by selecting the date option from custom



For example, if you want to view data for range between 25th Dec to 26th Jan, select option **Start Date 25th Dec** and **End Date 26th Jan** click **Apply**



It will display page view data for Date Range Between 25th Dec to 26th Jan



The following table provides the definition for each of these user metrics:

Metrics	**Definition**
Event Name	Name of triggered event
Active users	The number of unique users who engaged with your site in the specified date range
Page title	Webpage title viewed
Event Count	Total times event occurred
Total Users	Unique users involved
